2007 *Electronic Lifestyles*<sup>®</sup>  
Award Winner

## Innerspace Electronics, Inc. Receives Electronic Lifestyles<sup>®</sup> Designer Award from International Trade Association

INDIANAPOLIS (September 2007) — The Custom Electronic Design & Installation Association (CEDIA) has honored Innerspace Electronics, Inc. for excellence in the design and installation of electronic systems. CEDIA's Electronic Lifestyles<sup>®</sup> Designer Awards are considered the most prestigious awards program for the \$10 billion residential electronic systems industry.

Work submitted for the Electronic Lifestyles<sup>®</sup> Designer Awards is completed in consumer homes around the world in the following categories: home theaters, integrated homes, media rooms, hidden installations and more. Submissions range from \$40,000 single-room projects to whole-house integration systems that carry price tags topping \$3 million.

Innerspace Electronics, Inc. was selected for an Electronic Lifestyles<sup>®</sup> Designer Award for the design, and installation, of the best integrated home system between \$450,000 - \$545,000.

Innerspace Electronics, Inc. provided their client with a state-of-the-art house integrated control system, encompassing control of audio, video, home theater, lighting, window treatments, HVAC, radiant interior & exterior floor heat, security, surveillance, and pool control. The firm also designed, provided, and installed the house personal computers, broadband network, and a telephone/intercom system.
